Stormwater Services Program

325 Paradise Street
Pullman, WA 99163

Phone: (509) 338-3314

Fax: (509) 338-3282

Email: [click here](#)

Located in the Public Works Department on the west end of the second floor of City Hall.

Program Purpose: To provide Pullman's citizens, business owners and City staff with a central point of contact and coordination for stormwater related issues.

Program Goals: To improve our local environment and quality of life by reducing pollution, maintaining and improving infrastructure, reducing impacts to the natural drainage system and increasing awareness on stormwater issues.

To meet these goals, the Stormwater Services Program is responsible for coordinating the following activities:

- Development & implementation of [Pullman's Stormwater Management Program \(SWMP\)](#)
- Administration of the City's [Phase II Municipal Stormwater Permit](#)
- Maintenance, operation, and improvement of Pullman's storm drain system
- Development & implementation of [public education programs](#) regarding water quality and pollution prevention
- Review of design work & inspection of new residential and non-residential storm facilities [\(standards & specifications\)](#)

- Inspection of private stormwater systems [\(annual maintenance reports\)](#)
- Investigation & resolution of water quality and drainage problems [\(report a problem\)](#)
- Enforcement of [Pullman City Code](#) and other ordinances and policies related to stormwater
